

PHD STARTER PACKAGE -NEW

For the doctoral programme, a fee is charged for each calendar year in which you are registered. You can save money if you are well prepared for the doctoral phase. GBFE offers doctoral students a starter package (optional). This starter package begins in August before the year of first registration, i.e. at the same time as registration for the doctoral programme. The starter package includes the registration costs, the fee for the M&D seminar in the current year, the proposal workshop in autumn, and individual support from a GBFE lecturer from your subject area, whom we will also recommend as a supervisor from the respective university. This means that you will be supported in writing your proposal even before you officially register with Unisa or UP, which can ultimately lead to a reduction in the overall duration of your studies. A flat rate of €700 is charged for this starter package.

Please register for the PhD starter package with Dorothea Krämer (info@gbfe.eu) by July at the latest.
